**Interacting and Navigating the Web3 Environment
Training and Development Manual Series A**

Chapter 1
BlockChain

1-1. The blockchain is a public ledger that records transactions in what is called blocks, they communicate using cryptography. Blockchains are typically managed by a peer to peer network, where nodes validate new blocks that are created.

1-2 Most cryptocurrencies use blockchain technology to record transactions. For example, the Bitcoin network and Etherium network are both based on blockchain.

1-3 Establishing an account on a Major regulated exchange is the first step to onboarding. Your first task will be to watch the following videos in order. Then proceed to the next section.

    1. Watch This Video for a Primer in how to use Coinbase [Watch](#)
    2. How to Set up Crypto Wallet [Watch](#)
    3. How to Send Crypto [Watch](#)

1-3 If using your phone, go to app store or google play and download the coinbase app, MetaMask app and Coinbase wallet app.

1-3 If using a computer, go to [Coinbase](#) and register for an account.

2-1 Next creating a wallet so we can transact outside of coinbase.

Your second task will be to watch the following videos in order. Then proceed to the next section.
1. What is Meta Mask [Watch](#)
2. Getting Started with Meta Mask [Watch](#)

2-2 Now go to https://metamask.io/ to register and download the Meta Mask Wallet. Have a pen and paper close to write down your seed phrase. NEVER SHARE YOUR SEED PHRASE WITH ANYONE.

2-3 Let's add a network to Meta Mask. For the purpose of this training we will be using the polygon network as it's fee's are basically free. To add a network in Meta Mask.

2-4 Screenshot 1.1 *add network instructions from left to right*
Click the three dots in the top left,
Select Settings,
Select Network,
Select add Network,
Add info in screenshot 1.11

3-1 Enter information from Screenshot 1.11 below and hit add network.

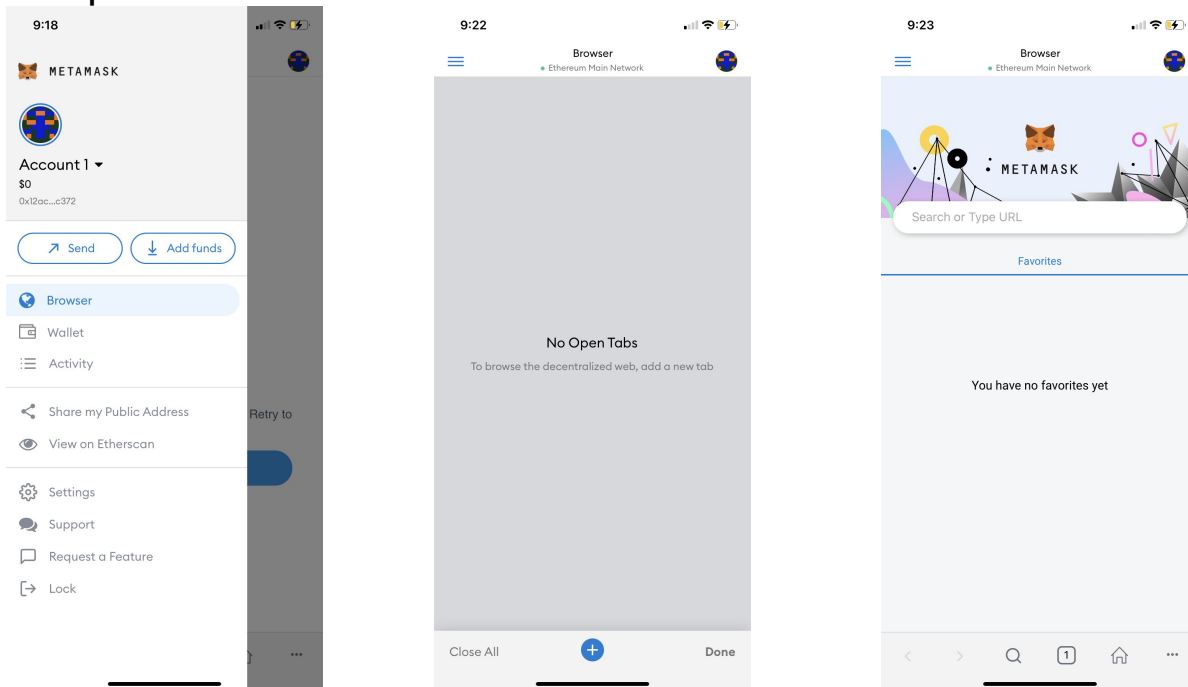

Chapter 2
Transactions

3-2 Now that you have a wallet you can utilize any website that ask for you to connect a wallet. When you connect your wallet you will be asked to sign a transaction using your wallet. The transaction is free, click the blue sign button to approve and connect.

3-3 To practice signing in on your computer, we're going to go to the largest nft website on the planet. Go to https://opensea.io and hit connect your wallet.

3-4 To disconnect from a site click the three dots on the right top of the wallet. Select connected sites. On the screen it will show you which sites your wallet is currently connected to. Log of by clicking the disconnect icon to the right of the website.

4-1 To practice signing in on your phone,
open meta mask in your phone,
click the three lines,
select browser from the menu.
Click the plus button in the blue circle,
Enter opensea.io in the browser bar and connect wallet when asked.

Chapter 3
Buying items with Cryptocurrency
